

CALLS FROM HOME UK NON-GEOGRAPHIC CALLS

Prices effective from 16th February 2009

Direct Dialed call charges

Each non geographic dial code is in a charge band. To find out how much it costs to call a particular non-geographic number, you'll need to know which charge band the dial code fits into. To do this, follow the steps below.

1. If you know the dial code for the number you want to call, look it up in the table below.
 2. The dial code will have a charge band written next to it, which you can make a note of.
 3. Now open up the Residential Tariff guide and here you'll see each of the charge bands, with the call costs right next to it.
- Call charges are shown in pence per minute and you'll be charged for every minute that you're connected to the network.
 - Call durations are accurate to plus or minus 1.1 seconds and are rounded up to the next minute.
 - Charge band periods are accurate to plus or minus 1 minute.
